

# LOGISTIC SOLUTIONS FOR CONSTRUCTION SITES

# THE GOOD FEELING THAT EVERYTHING IS GOING WELL

On the construction site, you lose often valuable time by procuring materials. Optimize your processes with reduced shipping times – it is more easy with the optimized system for your construction projects or the relevant construction phase with the customized BAULOC® solution from Würth.

The solution ranges from the specific order-picked delivery, to the supply of vending systems, to just-in-time or just-in-place delivery of your material requirements directly to the construction site.

In order to support you as much as possible, that you can concentrate on your core competences we adapt our service individually. Many people call this service. We call it passion.

#### Your advantages:

- The required material is always available as needed
- Costly interruptions to construction due to missing material are avoided
- You can concentrate on your core business
- Low storage costs and capital commitment
- A contact person for your requirements – can be contacted at any time
- Competent and professional advice by industry-specific trained staff

# THE BAULOC® STATION

Your Würth branch office on the construction site.

For major construction sites, Würth sets up BAULOC® stations. These shops are managed by a Würth employee – similar to a small branch office. With an average of over 300 items, a wide range is available that can be adapted according to the construction phase.

The trained Würth employee is always on site with advice and support.

Perfectly to the following trades, such as general construction companies, steel and metal construction, façade construction, building services, electrical engineering, fire protection, dry walling and many more.

### Requirements on site

- Free storage area with an attached ground
- 32A electric power connection
- The size of the station is individually adapted to the construction project

### Advantages for you with the BAULOC® station

- Material can be picked up directly from the construction site as well as ordered
- Transit times are reduced
- The product assortment is customized
- Würth is responsibility for the stock
- No storage costs for the customer

# THE BAULOC® LOGISTIC SERVICE VAN

Your Würth branch office on wheels.

The BAULOC® logistic service van is servicing various construction sites in urban areas and supplies material directly on site. With over 250 items in stock, the BAULOC® mobile covers the short-term needs of all involved companies at the construction site.

The shop is perfectly designed for general construction companies, those in steel and metal construction, façade construction, building services, electrical technology, fire protection, dry walling and many more.

## Advantages for you with the BAULOC® mobile

- Short-term requirements can be covered immediately
- Trained experts as contact person
- Würth is responsibility for the stock
- No storage costs for the customer

# THE CONSTRUCTION SITE SALES REPRESENTATIVE

Your personal contact on the construction site.

The Würth construction site sales representative is supporting and servicing you across the country, directly on your construction site. Our employees have special trainings to the needs of big construction projects. Specifically for the needs of general contractor and subcontractors from the ground-breaking phase to the final building - individually aligned to the construction phase.

The construction-site sales representative supports all involved companies like general construction companies, in steel and metal construction, façade construction, building services, electrical engineering, fire protection, dry walling and many more.

## Your construction-site sales representative helps you moving forward

- Contact person for complete C-parts management
- Quick access to products and service
- Transit times are reduced
- Integration of system solutions, such as ORSY® system shelving, BAULOC® construction-site logistics, safety plans and many more

# THE CONSTRUCTION SITE DELIVERY SERVICE

On the road for you on the construction sites!

Our **Würth construction site delivery service** offers you a noticeable plus in delivery quality across the largest metropolitan regions. The consignment is always handed over personally by qualified employees – time-consuming locating of the goods on the construction site is history!

The construction site delivery service is primarily used for the delivery of **packaged goods**. Pallets and oversized items are mainly delivered by forwarding agencies or special service providers. Translated with [www. DeepL.com/Translator](http://www.DeepL.com/Translator) (free version)

# WE ARE THERE FOR YOU! ON THE CONSTRUCTION SITE.

Things can often get rough on a construction site. This is why robust and secure systems are required to protect your machines and equipment.

Thanks to BAULOC®, Würth offers you solutions that have been designed for the toughest outdoor use. Advantage: You have everything where you need it and can safely store your equipment. Or, in other words: 100% system. 0% stress.
