

Circular metal saw blade, HSS, finely toothed, form A

For universal use up to 1000 N/mm² in thin-walled workpieces and shallow cutting depths, on conventional machines

Application

For making saw cuts in thin-walled workpieces and shallow cutting depths in the material groups of steel, stainless steel, cast iron and non-ferrous metals.

Version

- Precision-ground circular metal saw blade with tooth shape A, finely toothed, laterally hollow ground, hole without keyway, up to a diameter of 160 mm without collar, from a diameter of 200 mm with collar

Advantage

- Innovative cutting geometry ensures very high dimensional accuracy, process reliability and chip removal
- High-quality cutting material for very high service life requirements
- Universal use in numerous applications

Application	Steel (N/mm ²)			Stainless steel		Alu		Brass		Bronze		Plastics	Graphite G(C)FK	GG(G) GjMW	Titan-alloy	Nickel-alloy	Super-alloy	Hard mat.

Art. No.	14002 065
Tooth shape	A
Cutting material	HSS
Thickness of cutting edge	0.3 mm
Tolerance of cutting edge diameter	js15
Tolerance of cutting edge thickness	js11
Tolerance of hole diameter	H7
Cutting edge diameter	25 mm
Bore diameter	8 mm
Number of teeth	80 PCS
DIN	1837

EAN-Code
