

## Circular metal saw blade, HSS, finely toothed, form A

For universal use up to 1000 N/mm<sup>2</sup> in thin-walled workpieces and shallow cutting depths, on conventional machines

### Application

For making saw cuts in thin-walled workpieces and shallow cutting depths in the material groups of steel, stainless steel, cast iron and non-ferrous metals.

### Version

- Precision-ground circular metal saw blade with tooth shape A, finely toothed, laterally hollow ground, hole without keyway, up to a diameter of 160 mm without collar, from a diameter of 200 mm with collar

### Advantage

- Innovative cutting geometry ensures very high dimensional accuracy, process reliability and chip removal
- High-quality cutting material for very high service life requirements
- Universal use in numerous applications
