Multimar universal measuring device

Application
For universal measurements of diverse tasks, e.g. external and internal measurement of bores, threads, toothing, recesses, grooves etc.

Version
- Direction of the measuring force can be changed for measuring external or internal dimensions
- Integral measuring force spring to ensure a constant measuring force
- The movable measuring arm holder is housed in a high-precision ball-bearing guide to minimise play and friction
- Strong, ground, hard chrome-plated column
- Mount for dial gauges and precision pointers, Ø 8 mm

Delivery
Operating instructions, mounting and storage blocks, wooden box (without display unit, gauge slides)
