

PVC pendulum gate - simple construction

Application

To prevent cold air draughts and for acoustic insulation in passageways with up to 3000 x 3000 mm clearance. Gates close automatically on passing through.

Execution

- Reinforcement: Galvanised steel profile, equipped with one upper and one lower maintenance-free bearing per wing
- Opening angle in both directions 90°
- Closed by adjustable spring force
- Protected, maintenance-free spring closure in profile system
- Pendulum door curtains are screwed to the transverse beam and held in the profile with free-flowing sides
- Door curtain: Soft PVC in standard quality, clear/transparent, 7 mm thick
- Approx. 100 mm central overlap already included
- Includes corner reinforcement to prevent corner tears

Delivery

Pre-assembled, ready to fit and designed for simple installation. Fastening screws included
