

Crimping tool for wire end ferrules 0.08–16 mm

Self-adjusting, square pressing

Application

For crimping wire end ferrules with self-adjustment function.

Version

- Special grade chrome-vanadium electric steel, oil-hardened
- Self-adjusting square crimping

Advantage

- 20% less force applied when crimping
- Reduced handle width and improved ergonomics, with 2-component handles
- Consistently high crimping quality thanks to force stop function (can be unlocked)
- Crimping pressure is factory-set for precision
- Knee lever creates additional force for fatigue-free working

Art. No.	53117 010
Length	180 mm
Suitable for min./max. diameter	0.08-16 mm
Material of the grip handle	2-component plastic
