

## Safety goggles with frame

SecureFit™ 3700 model

**3M**

### Version

- Can be worn over prescription glasses
- Integrated eyebrow protection: Sits comfortably on the forehead and provides protection against airborne particles
- Temple pressure distribution technology distributes pressure above the ears, increasing wearing comfort
- Multi-level arm angle adjustment for individual adjustment to any face shape
- When water droplets condense on the lens, the Scotchguard™ anti-fog coating turns them into a thin, transparent film so that the safety goggles with frame do not fog
- Frame designation: 166 FT
