

**solid carbide metal circular saw blade, coarse-toothed, type B**  
for universal use up to 1000 N/mm<sup>2</sup> in larger cross sections and cutting depths on CNC machines

**Application**

For making saw cuts in large cross-sections and for medium to deep cutting depths in the material groups of steel, (stainless steel), cast iron and (non-ferrous metals).

**Version**

- precision-ground metal circular saw blade with tooth shape B, fine-toothed, hollow ground on side

**Advantage**

- innovative cutting geometry with large chip space ensures chip removal and universal application
- high-quality cutting material for very high service life requirements
- universal use in numerous applications
