

End mill mounting plate Rectangular

Application

The various mounting plates can be joined together in modules to form a plate system. Each plate body has dovetail-shaped couplings on the sidewalls. They form an invisible connection so that combinations appear as one unit.

Execution

- Rectangular
- Each with the same shank holes to each accommodate a certain shank diameter
- Plate bodies made of red injection-moulded plastic
- Robust, easy to handle, sits well
- Tools with a short clamping shank protrude far enough out of the location hole to be easy to remove
- All shank bores have an open base to prevent blockages, e.g. by chips
- Slightly conical hole guide for easy handling of the end mill

Delivery

Mill not included

Technical Data

Product number	1016005 105
Material	Plastics - Polyamide PA
Manufacturer Part Number	99129669/98710374
EAN Code	4024496027125
Commodity Code	39191080
