

CLIP-O-FLEX support rail in different lengths

CLIP-O-FLEX®

Application

For mounting on flat surfaces such as walls, machines, workbenches, tool cases, hole grid plates

Execution

- made of naturally anodised aluminium
- pre-drilled, suitable for perforated metal plate walls with centre-to-centre distance 38 mm
- incl. lateral cover caps on left and right
- Total length = nominal length + 5 mm (cover caps)

Advantage

- Elements can be inserted into the sophisticated rail profile in various angles from 0-90° using the insert profiles and trays no. 1082511 101-108
- The profiles are can be easily moved sideways within the rails
- A tray, storage compartment or shelf can be inserted into the rail or detached again with only one movement
- Optimum horizontal and vertical flexibility
- Ergonomic and flexible workplace design

Technical Data

Product number	1082514 101
Material	Aluminium
Surface	Anodised
Number of drill holes	2 PCS
Manufacturer Part Number	8173860
