

### Spit and sneeze guard Without/with hatch

#### Application

The counter attachment is designed exclusively for use as a sneeze guard and can only be used for these purposes. Any other use is at your own risk and responsibility and does not correspond to the intended use.

#### Execution

- Acrylic/plexiglass screen coated with protective film on both sides
- Wooden feet (planed, ground and painted brown), stable and with variable adjustment
- Art. no. 1087103 100 without document hatch
- Art. no. 1087103 101 with document hatch

#### Advantage

- Assembled by simply inserting the acrylic/plexiglass screen into the recesses (groove) in the feet
- The distance between the feet can be freely adapted to suit the setup situation
- However, we recommend maintaining a minimum spacing of approx. 300 mm (30 cm) to give the structure sufficient stability
- We recommend only removing the protective films after installation to avoid damaging the surface of the window (scratches)
- During assembly, the protective film can be partially loosened to position/mount the feet

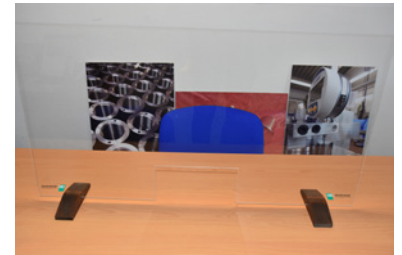

#### Delivery

- 1x acrylic/plexiglass screen
- 2x wooden feet

#### Notes

The disposal of individual components must be carried out in accordance with the relevant rules of waste management (e.g. material separation). All parts can also be disposed of with normal household waste.

Note on environmental protection: Before final disposal, please consider whether the individual components could be recycled.

### Technical Data

Product number	1087103 101
Width	1000 mm
Height	600 mm
Depth	180 mm
Manufacturer Part Number	F-013998
Commodity Code	39269060
