

Replacement filter Dräger X-plore®-Rd40

Execution

The Dräger-X-plore®-Rd40 filter series with standardised round thread in accordance with EN 148-1 provides optimal protection against almost any hazardous material. The filters, which are optimised in terms of breathing resistance, size and performance, are suitable for all commercially available half- and full-face masks featuring the Rd40 connection system, as well as Dräger X-plore® masks in particular.

Notes

Additional filters and accessories deliverable on request.
