Slip guard carabiner
For Dräger PARAT® 3000

Dräger

Execution

The slip guard carabiner fulfils two functions: as a carabiner hook, and as fall protection for the Dräger PARAT® filtering escape device. When wearing the PARAT® 3000 on the belt clip, the slip guard carabiner is attached to the belt loop. If the device slips off the belt, it will still remain attached to the wearer. The slip guard carabiner is attached to the device together with the belt clip.
