

Cable tie tensioner

Application

Suitable for cable ties with sub-miniature, miniature, medium and standard cross sections.

Execution

- Bevelled tie insertion point allows the tie to be inserted quickly into the side of the tool, speeding up installation
- Long, narrow nose improves the installer's field of vision and allows better access in tight spaces
- Easy-to-read label for tension adjustments, eliminating unnecessary guesswork
- Tension adjusting knob with 1/2-step tension adjustment for simpler work, as only one setting needs to be made
- Lightweight, stable, impact-resistant resin housing
- Soft, non-slip trigger and rear handle cushion the fingers and hand while working
- Ergonomically shaped handle for natural and comfortable force transmission from all fingers when operating the trigger
- Tool hanging hook for easy storage
- Improved cable tie cutting mechanism reduces impact on installer's hand by 40%, which is the lowest in the industry
- Less force is required at the handle to cut the cable tie - 15% less than with comparable tools

PANDUIT

Technical Data

Product number	1062319 101
Manufacturer Part Number	GTS-E
Commodity Code	82032000
