

Spray protection cover With HT coating

Application

For welding, soldering and grinding

Execution

Spray protection cover with high-temperature coating on both sides. Protects easily flammable or sensitive objects from sparks, weld spatters and pearls and reduces the risk of fire. Durable up to 750 °C, short-term up to 850 °C. Mechanically resilient, abrasion-resistant. Dimensions 600x1,000 mm. Non-flammable: A2 - s1, d0 in accordance with DIN EN 13501-1.

Technical Data

Product number	1002708 025
Manufacturer Part Number	S2750610
Commodity Code	70199000
