

Pneumatic adapter and accessory set

Application

The tyre inflator and gauge and the corresponding adapter set can be used to check and correct the air pressure on cars, bicycles and other vehicles.

Execution

- The tool set covers compressed air inflating and blowing applications
- Tyre pressure gauge for checking and adjusting air pressure in car and motorcycle tyres (incl. adapter for bicycle tyres and ball needle)
- Spiral hose for flexible working
- Blow-out gun for blowing off surfaces and workpieces

Advantage

- Due to their low air requirement, the tools can also be operated with smaller compressors

Delivery

1 tyre pressure gauge incl. 3 adapters

1 spiral hose (4 m)

1 blow-out gun
