

Round nozzle

Application

With these noise-reducing nozzles, a lower noise level is achieved with proper use compared to conventional single-hole nozzles with the same blowing force. The nozzles are mainly equipped with a noise-reducing plastic insert and are recommended by the Trade Association Institute.

Execution

- Low-noise round nozzle. M12x1.25, safety nozzle standard design, zinc high-pressure die casting, length 46.0 mm, nozzle outer dia. 17 mm

Technical Data

Product number	1075035 206
Max. operating pressure	10 bar
Material	Die-cast zinc
Manufacturer Part Number	22204
Commodity Code	84249080
