

Round nozzle quiet

Application

With these noise-reducing nozzles, a lower noise level is achieved with the correct application compared to conventional single-hole nozzles with the same blowing force. The nozzles are mainly equipped with a noise-reducing plastic insert and are recommended by the Trade Association Institute.

Execution

- By turning the outer nozzle ring by a total of 125°, setting secured by notches
- Pressure regulating nozzle, connection M12x1.5, aluminium/POM

Technical Data

Product number	1075035 205
Material	Aluminium
Surface	Aluminium FINISH
Manufacturer Part Number	22206
Commodity Code	84249080
