

Pressure-regulating nozzle for blow-out guns

Application

For controlling the flow of air and reducing pressure.

Execution

- Basic body made from aluminium, other parts POM
- Volume flow: 10 to 95 l/min at 6 bar
- Can be adjusted by twisting the operating sleeve between seven increments marked with +/-, 125° in total

Advantage

- Regulating the flow downwards prevents sharp and pointed chips or harmful fluids flying around uncontrollably, for safe working
- Saves energy and thus costs
- Additional noise reduction effect

Technical Data

Product number	1075035 200
Material	Aluminium / polyoxymethylene
Surface	Plastic
Manufacturer Part Number	109/44
Commodity Code	84249080
